2013/MARKT/010	Marché intérieur et services	Amendments to the EU rules governing collective investment funds, notably in the areas of Money Market Funds, long-term investment funds and certain aspects of the UCITS Directive (Undertakings in Collective Investments in Transferable Securities 2009/65/EC) such as eligible assets and use of derivatives, efficient portfolio management (EPM) techniques, OTC derivatives and depositaries	MARKT	octobre 2013	Traité sur le fonctionnement de l'Union européenne: Article 114 for a regulation and article 53(1) for a directive	procédure législative ordinaire (COD)	X		Programme de travail de la Commission / 2013 / CWP2013 The UCITS rules have constituted Europe's regulatory framework for asset managers and investors since 1985. To keep the UCITS framework topical and in line with the evolution of investment markets, some reforms are envisaged. Recent international work on shadow banking has identified certain areas that require closer scrutiny: money market funds and the use of securities lending or repurchase arrangements (repos). The short-termism of the financial markets is often not in line with the financing needs of the "real economy". Fostering a culture of long-term investment in Europe is therefore an important challenge. The intention is to address a number of concerns relating to the efficiency, competitiveness and integration of the market for UCITS funds in order to preserve the UCITS attractiveness for both professional and retail investors.

2013/MARE/108	Pêche et affaires maritimes	Proposal for a Regulation of the European Parliament and of the Council amending technical measures and control regulations to implement the landing obligation.	MARE	juin 2013	Traité sur le fonctionnement de l'Union européenne: Article 43(2) TFEU	procédure législative ordinaire (COD)		O	A central objective of the proposed reform of the Common Fisheries Policy (CFP) is the elimination of discards in EU fisheries through the introduction of an obligation to land all catches. In order to make this landing obligation operational it has been identified that certain provisions within the current technical measures and control regulations run contrary to the landing obligation and oblige fishermen to discard fish. These provisions need to be removed or amended. Therefore the main policy objective of this initiative is to facilitate the implementation of the landing obligation envisaged under the CFP reform by removing all existing provisions from EU technical measures and control regulations that run contrary to the landing obligation.
2012/MARE/018	Pêche et affaires maritimes	Proposal for a Council Regulation on autonomous EU tariff quotas on imports of certain fishery products into the Canary Islands.	MARE	2ème trimestre 2013	Traité sur le fonctionnement de l'Union européenne: Article 349 TFEU.	procédure législative spéciale - consultation du Parlement européen (CNS)			Current autonomous EU tariff quotas on imports of certain fishery products into the Canary Islands implemented by means of Council Regulation (EC) 645/2008 will expire on 31 December 2013. The exceptional geographical situation of the Canary Islands in relation to the sources of supply of certain fishery products which are essential for domestic consumption entails additional costs for this sector. This natural handicap, as recognised in Article 349 TFEU, resulting from insularity, remoteness and outermost location can be remedied, inter alia, by temporarily suspending customs duties on imports of the products in question from third countries within EU tariff quotas of an appropriate volume.

2013/MARE/055	Pêche et affaires maritimes	Proposal for a Regulation of the European Parliament and of the Council amending Council Regulation (EC) No 676/2007 of 11 June 2007 establishing a multiannual plan for fisheries exploiting stocks of plaice and sole in the North Sea.	MARE	3ème trimestre 2013	Traité sur le fonctionnement de l'Union européenne: Article 43(2) TFEU	procédure législative ordinaire (COD)	X		The objective is to ensure that the stocks of plaice and sole are harvested at levels which can provide the maximum sustainable yield from 2015 onwards. The effort management as established by the plan does not reflect the situation of stock development. The plaice stock is currently at the highest level on record, and fishing mortality is well below Fmsy level, which allows increasing fishing effort on plaice. The fishing mortality on sole is well above Fmsy, requiring fishing mortality and fishing effort reduction. This leads to certain degree of incompatibility for the management of the stocks. This amendment aims to prevent any future conflicts arising between the management needs of the sole and plaice fisheries when applying the fishing effort regime of the plan.

The EU is a Contracting Party to these Conventions (except for the CCSBT to which the EU is a Cooperating Non-Member) and the measures adopted are binding on the EU, which has to transpose them into EU law.

2013/MARKT/046	Marché intérieur et services	Legislative proposal to improve the European market for longer term investment funds	MARKT	24 juillet 2013	Traité sur le fonctionnement de l'Union européenne: 114	procédure législative ordinaire (COD)	X		The general goal is increased long term investment in the EU in infrastructure, social projects, long term growth plans of SMEs, etc. Pension funds and insurance companies are key potential investors in longer term projects, but cannot always make such investments themselves, and so depend on investment funds. Yet evidence suggests such funds are not always easy to identify or that they do not always take the right form, undermining their use. Given this, the specific aim is to foster a flourishing market for funds focused on longer term investment, by making such investment funds easier to identify and more cost-effective to run. The proposals form part of the SMA II. They are linked to the green paper on long term investment.

2013/ECFIN/017	Affaires économiques et monétaires	Communication from the Commission - Adjustment path towards the medium-term budgetary objective: a time-frame for convergence and possibilities to balance productive public investment needs with fiscal discipline objectives	ECFIN	29 mai 2013				The aim of the Communication is twofold. First, it proposes for the TSCG Contracting Parties a time-frame for convergence of the structural balance towards the medium-term objective, as per the mandate given to the Commission in Article 3 (1b) of the TSCG. Second, it introduces an "investment clause" to balance productive public investment needs with fiscal discipline objectives in the preventive arm of the SGP, as per the mandate of the "Two-Pack" (Art. 16(2) of the Regulation on enhanced monitoring). The clause would allow eligible Member States to re-calibrate, under well-defined conditions, the adjustment path towards the MTO as set in the time-frame for convergence.

2013/EEAS/010	relations extérieures	Joint Communication to the Council "EU Strategic framework for the Great Lakes Region"	EEAS	juin 2013				FAC requested, last November, the High Repr & Commission to bring forward proposals for a strategic EU approach to multi-faceted security and development challenges that the Great Lakes region is currently facing. The recent signing of a "Framework Agreement" by the DRC and 10 neighbouring countries justify a more comprehensive EU response, based on 5 stumbling blocks: a) Tackling governance problems in the DRC including SSR, human rights and the rule of law; b) To ensure sustainable security; c) Rebuilding the economy of the region; d) Rebuilding trust between neighbours; e) Setting up a robust international support mechanism. The communication also provides a series of indicative general actions the EU can pursue as a contribution to a global effort involving Member States, countries in the region & the rest of the international community.
