

CONSEIL CONSULTATIF POUR NORTH WESTERN LES EAUX OCCIDENTALES WATERS SEPTENTRIONALES ADVISORY COUNCIL

Consejo Consultivo para Las Aguas Noroccidentales

MINUTES

WORKING GROUP 2 (CELTIC SEA)

The Main Conference Centre – Dublin Castle

Wednesday 12th September 2018 16:15 – 17:30

1. Welcome and Introduction

The Chair Jesus Angel Lourido Garcia opened the meeting and welcomed the participants.

Apologies were received from Javier Lopez (Oceana) and Alex Kinninmonth (RSPB). The agenda was adopted as drafted.

The Secretariat updated the meeting on the action points from the last meeting (3rd July 2018):

1. The working Group will draft advice for the COM on setting the fishing opportunities for 2019 based on the discussion

The WG had discussed the ICES advice at the meetings in Ghent. The Secretariat drafted the advice based on these discussions. Before sending the draft advice to the General Assembly, the chairs of the WG provided their comments. ExCom received the latest version for final approval in advance of the meeting tomorrow (13th September).

2. Write a letter to the COM requesting an independent ICES evaluation on seismic activities in NWW and the potential effects.

Dr Antony Hawking and Dr Robert Gisiner gave a presentation on this topic at the Horizontal Working Group (see <u>website</u>). This working group has to propose action points under agenda item 3.

2. Input on the draft advice 'Addressing Choke Risk in NWW after exemptions' for relevant WG2 stocks

Mr Rihan (BIM) presented an overview of the draft advice for the relevant stocks of WG2.

Members raised concerns about the impact of high risk and zero quota stocks. The table in the draft advice identified the problems, but the AC has come up with few solutions. Collecting scientific evidence for the exemptions on high survival and *de minimis* is on-going, but will not resolve the full choke problem.

CONSEIL CONSULTATIF POUR LES EAUX OCCIDENTALES SEPTENTRIONALES ADVISORY COUNCIL

Consejo Consultivo para Las Aguas Noroccidentales

In the new Joint Recommendation the combined *de minimis* exemptions for pelagic species has been replaced by two single species *de minimis*, one for mackerel and one for hors mackerel. These single species DM exemptions do not resolve the problem for boarfish, herring and argentine which creates specific problems for several members states, especially as some MS have no quota.

Regarding zero TAC stocks, the COM clarified that when ICES advises zero catch advice, there need to be measures in place that will control fishing mortality. Solutions for zero quota stocks generally impact relative stability which Member States do not like to change. For some of these stocks, the ICES TACMAN¹ advice may reveal alternative management measures.

The COM highlighted that part of the process of finding solutions for the full implementation of the LO is identifying the different choke issues, and understanding why certain solutions will or will not work. The advice of the AC is important is this regard.

The chair thanked members and COM representative for the useful input and emphasized that the discussion of today will be included in the advice on 'addressing Choke Risk in NWW after exemptions'.

ACTION: Members are invited to send their input on the draft advice on the LO to the Secretariat in advance of the web meeting (24th September)

3. Proposed actions on underwater noise in NWW

Members appreciated the presentations given during the Horizontal Working Group by Dr Hawkins and Dr Gisiner. Members highlighted the importance of increased coordination of different human activities between Member States. Only fishing industry representatives of the respected MS in whose jurisdiction the seismic activities are taken place are notified. It would advantages to coordinate the surveys so they do not overlap with e.g. spawning season of *Nephrops*.

ACTION: Request to the MS Group on how to improve the coordination between MS on seismic activity

The potential effects of underwater noise have to be assessed as part of the Good Environmental Status of the marine environment (descriptor 11, Directive 2008/56/EC). The scientific studies illustrated that sound is important for marine organisms and side-effects of human-made noise should be considered in more detail in impact assessments.

ACTION: NWWAC to ask ICES how the effects of underwater noise are being integrated in assessments as part of ecosystem based approach to fisheries

¹ ICES 2018a EU request for ICES to provide advice on a revision of the contribution of TACs to fisheries management and stock conservation for selected deep-water stocks (<u>link</u>) and

ICES 2018b EU request for ICES to provide advice on a revision of the contribution of TACs to fisheries management and stock conservation (<u>link</u>)

In relation to seismic surveys in the Irish Sea, Dr Gisiner explained that at shallow depths, like around the Ilse of Man, the repetition and distance between tracks of seismic blasts is reduced.

4. Summary of actions agreed and decisions adopted by the Chair

1	Members are invited to send their input on the draft advice on the LO to the Secretariat in	
	advance of the web meeting (24 th September)	
2	Request to the MS Group on how to improve the coordination between MS on seismic activity	
3	NWWAC to ask ICES how the effects of underwater noise are being integrated in assessments	
	as part of ecosystem-based approach to fisheries
